CONDITIONS FOR APPROVAL

Part A: Domestic Sewage

1. No person shall discharge or apply any poisonous, toxic, noxious or obstructing matter, radioactive waste or other pollutants or permit any person to dump or discharge such matter into KAWSCO sewer unless the discharge of such poisonous, toxic, noxious or obstructing matter, radioactive waste or pollutant is treated to permissible standards as authorized by KAWSCO.
2. No surface storm water or rainwater should be discharged into the sewer system, a separate clearly defined drainage system should be provided. Any volume that will be discharged into the sewer system will be estimated over the period and charged a minimum of kshs. 10,000.
3. All manholes covers must be water tight.
4. Manholes frame and cover should be as per designed sample available at KAWSCO offices for you to view and must implement.
5. For commercial/residential houses with more than one-meter connection after sewer connection has been effected, the plot owner should provide the information to KAWSCO without being reminded failure to which a penalty of kshs. 10,000 will be debited into each of these accounts.
6. For sewer lines more than 20 meters in length, professional design should be prepared and submitted (profile and layout).
7. All construction stages must be inspected by KAWSCO.
8. Private source of water has to be disclosed and a reliable meter of our standard installed and sealed by KAWSCO staff.

Part B: Industrial/Trade Wastewater

1. All conditions in part A shall apply.
2. The owner/operator shall ensure that operations of the facility are managed in accordance with the Environmental Management Plan developed in the Environmental Audit.
3. The owner/operator shall not discharge or apply any poisonous, toxic, noxious or obstructing matter, radioactive waste or other pollutants or permit any person to dump or discharge such matter into KAWSCO sewer unless the discharge of such poisonous, toxic, noxious or obstructing matter, radioactive waste or pollutant is treated to permissible standards as set in our Fifth schedule of the Environmental Management and Co-ordination (Water Quality) Regulations ,2006.

4. The owner /operator shall manage any solid waste generated in accordance with the Environmental Management and Co-ordination (Waste Management) Regulations 2006.
5. The owner /operator shall develop and implement a routine inspection plan for the pre-treatment plant and allied structure.
6. The owner/operator shall ensure that competent personnel operate the facility.
7. The owner /operator shall give access to quality assurance officers from KAWASCO upon identification, even without prior notice, and provide information, reports, records and data during inspection including collection of effluent samples.
8. The owner/operator shall develop a pollution incident response plan covering the pretreatment plant and allied structure.
9. The owner/operator shall report all pollution incidents arising from the effluent pre-treatment facility and allied structure to KAWASCO through the incident hotline 0727-484139 / 0727-774141, [email:info@karuriwater.co.ke](mailto:info@karuriwater.co.ke) within 6 hours.
10. The owner/operator shall inform KAWASCO the mitigation measures put in place within 18 hours and submit the same in writing within 24 hours.
11. In the event of persistent non-conformances to the above conditions remedial measures shall be instituted that will include penalties in the form of fine (Kshs. 500,000/=) or as a last resort disconnection from the sewer system.

I agree to abide to the above conditions failure to which the company has express authority to surcharge the full cost deemed necessary to correct my failure due to any of the conditions above.
